

ETERNAL CONTINENT THE KAYU TOKEN

A New Era of Play-to-Earn Gaming

Blockchain-Powered Fantasy MMORPG

Executive Summary

Eternal Continent envisions an immersive MMORPG experience built on the Solana blockchain, seamlessly bridging virtual gameplay with tangible real-world economic value through the KAYU token. This innovative project is designed to redefine the play-to-earn landscape by offering a rich narrative, diverse gameplay, and a robust economic framework.

Play-to-Earn Mechanics

Empowering players to earn real value through in-game activities.

Five Unique Factions

Offering distinct roles and strategic depth within the game world.

Deflationary Token Model

Ensuring the long-term sustainability and value of the KAYU token.

Solana Blockchain Integration

Leveraging Solana's high throughput and low transaction costs for a smooth gaming experience.

NFT Integration

Providing true ownership of in-game assets with evolving properties.

"A new era of blockchain gaming where fantasy adventures yield real-world gains."

The KAYU Tree & World Lore

The Heart of Eternal Continent

At the heart of the Eternal Continent stands the colossal and ancient KAYU Tree. Legend has it that its roots permeate the entire world, extending into the ethereal blockchain dimension, where they absorb boundless energy.

Over countless ages, this energy has condensed within the tree's sap, crystallizing into the luminous KAYU Crystals.

The Essence of KAYU

These crystals are not mere minerals; they are the purest embodiment of energy, shimmering with an inner radiance, serving as both the world's soul and the fundamental bedrock upon which all civilizations thrive.

"The KAYU Crystals are the lifeblood of the world, the measure of all things."

KAYU Token Utility

KAYU Crystals are indispensable to life and power within the Eternal Continent, serving as the ultimate measure of strength, wealth, and status. Their primary in-game uses include:

Forging

Without KAYU, it is impossible to smelt weapons and armor potent enough to withstand the onslaught of monstrous foes.

Summoning

Only through the consumption of KAYU can ancient rituals be activated, allowing powerful warriors to be summoned from the depths of the blockchain.

Magic Circles

Whether for instantaneous teleportation, potent sealing spells, or the expansion of formidable magical domains, KAYU is essential to sustain their operations and power.

KAYU serves as the fundamental bedrock upon which all in-game economies and magical systems are built.

Player Interaction with KAYU

Players in Eternal Continent engage in a symbiotic relationship with KAYU, bridging virtual adventures with real-world economic value through four core interaction methods.

Combat

Engage in fierce battles against monsters or rival players. Victory yields valuable KAYU Crystals that can be used for crafting, summoning, or daily activities.

Exploration

Delve into ancient ruins and mysterious secret realms to uncover hidden KAYU veins and rich mineral deposits, translating discovery into tangible value.

Staking

Commit your KAYU to sacred spirit trees or altars, generating continuous passive income and contributing to the world's energy flow.

Quests

Undertake and complete challenging tasks issued by the world's will, earning substantial KAYU rewards for your efforts.

Virtual Gameplay

Real-World Value

Factions: Guardians & Alchemists

Guardian of KAYU

Tank / Defense

Beliefs

They are sworn protectors of the KAYU Tree, believing it to be the embodiment of the world's will.

Key Skills

- ✓ Utilize Crystal Armor to enhance their defense
- ✓ Manifest KAYU energy into shields to repel both magical and physical attacks

"If the tree falls, the world ends."

Crystal Alchemist

Support / Crafting

Beliefs

They are dedicated to uncovering the deeper mysteries of KAYU.

Key Skills

- ✓ Through alchemical arrays, they consume KAYU to forge weapons and concoct potions
- ✓ Construct mechanisms and devices using KAYU
- ✓ Enhance allies' equipment or temporarily infuse KAYU to boost combat power

"All things can be recreated through KAYU."

Factions: Stalkers, Oathkeepers & Raiders

Shadow Stalker

Assassin / Stealth

"KAYU belongs to those who act fastest."

Belief:

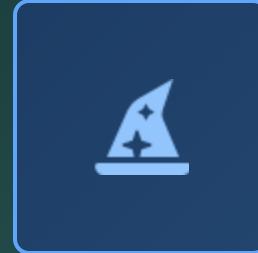

They prioritize power and wealth, indifferent to protection or destruction.

Key Skills:

- Proficient in infiltrating enemy territories to steal KAYU crystals
- High-burst assassination capabilities
- Speed and precision in combat

Arcane Oathkeeper

Ranged / Mage

"The essence of magic is KAYU."

Belief:

They regard KAYU as the sole wellspring of all magic.

Key Skills:

- Channel KAYU as a medium to unleash potent arcane spells
- Summon magic circles to manipulate time, space, or elemental forces
- Expertise in ranged combat and magical manipulation

Nomad Raiders

DPS / Wilderness

"Only through hunting does one deserve KAYU."

Belief:

Hailing from the untamed wilds, they live by plunder and adventure.

Key Skills:

- Fight alongside tamed beasts
- Summon colossal wilderness creatures to aid them
- Discover KAYU veins and ancient ruins in the wild

World Map: Central & Eastern Territories

Central Region

KAYU Sacred Tree Sanctuary

i This is the world's core, dominated by the towering KAYU Tree. It is enveloped by layers of magical barriers, resembling a radiant temple.

Controlling Faction

🛡️ Guardian of KAYU - Sworn protectors of the KAYU Tree, believing it to be the embodiment of the world's will.

Stronghold

The Sacred Castle, situated around the tree's roots, serves as their base, dedicated to protecting the tree and maintaining world order.

Eastern Territory

Arcane Spire Clusters

i A realm of floating islands and sky-piercing magical spires, surrounded by void rifts. Eternal starlight illuminates this region, where magic flows like an ocean.

Controlling Faction

🧙 Arcane Oathkeeper - They regard KAYU as the sole wellspring of all magic, channeling it as a medium to unleash potent arcane spells.

Stronghold

🏢 Their cities are suspended by KAYU crystals, forming aerial fortresses, serving as the highest academies for magic research and KAYU manipulation.

World Map: Western, Southern & Northern Territories

Western Territory

Wasteland & Giant Beast Plains

An expanse of endless wilderness, sand, and plains roamed by ancient giant beasts. This territory harbors numerous untapped KAYU veins, presenting both immense danger and opportunity.

Controlling Faction:

The Nomad Raiders

Stronghold:

They establish nomadic camps and beast enclosures, migrating with herds and storms, and are adept at discovering hidden resources and ruins in the wild.

Southern Territory

Shadow Capital

A city built beneath the earth and within swamps, perpetually shrouded in mist and shadows. The air here is thick with intrigue, and rogue guilds and black markets thrive.

Controlling Faction:

The Shadow Stalker

Stronghold:

Their capital, the "Shadow Palace," is the hub for all illicit transactions, a gathering place for those who seek to plunder KAYU and assassinate rivals.

Northern Territory

Crystal Workshop City

A land encircled by ice and mountains, rich in KAYU ore and rare metals. Massive workshops and mines are scattered throughout the valleys, where fires burn eternally.

Controlling Faction:

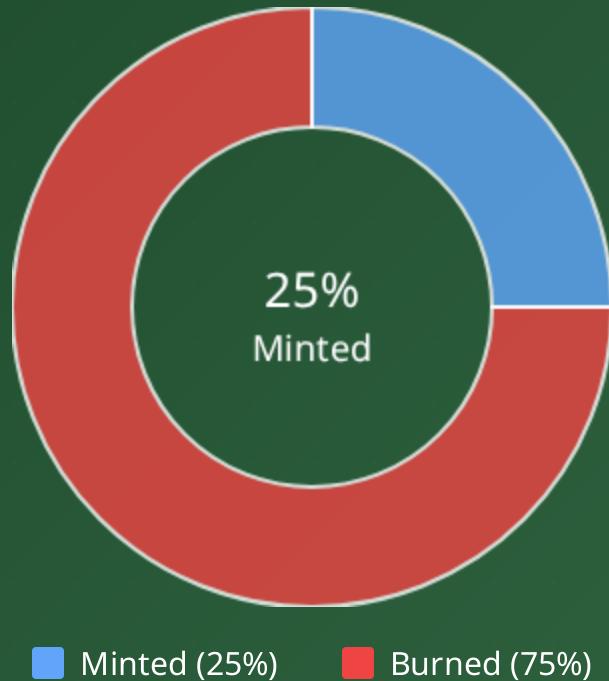

The Crystal Alchemist

Stronghold:

The artisans here have constructed the "Myriad Crystal Furnace," capable of refining KAYU into powerful weapons or artifacts. Their technical prowess makes them both suppliers and targets for other factions.

Each territory offers unique gameplay opportunities and strategic advantages

Tokenomics & Distribution

Total Supply: **1,000,000,000** KAYU

KAYU Token Contract:

FjPustc7ikQnzMfDHYEs7mkZaihwoJ6kiyAiQavW3ems

Fair Launch

250,000,000 KAYU (25% of total) minted on the FlipFlop platform, ensuring broad accessibility and decentralized distribution.

Burned Supply

750,000,000 KAYU (75% of total) permanently destroyed, implementing a significant deflationary mechanism from the outset.

Airdrop Plan

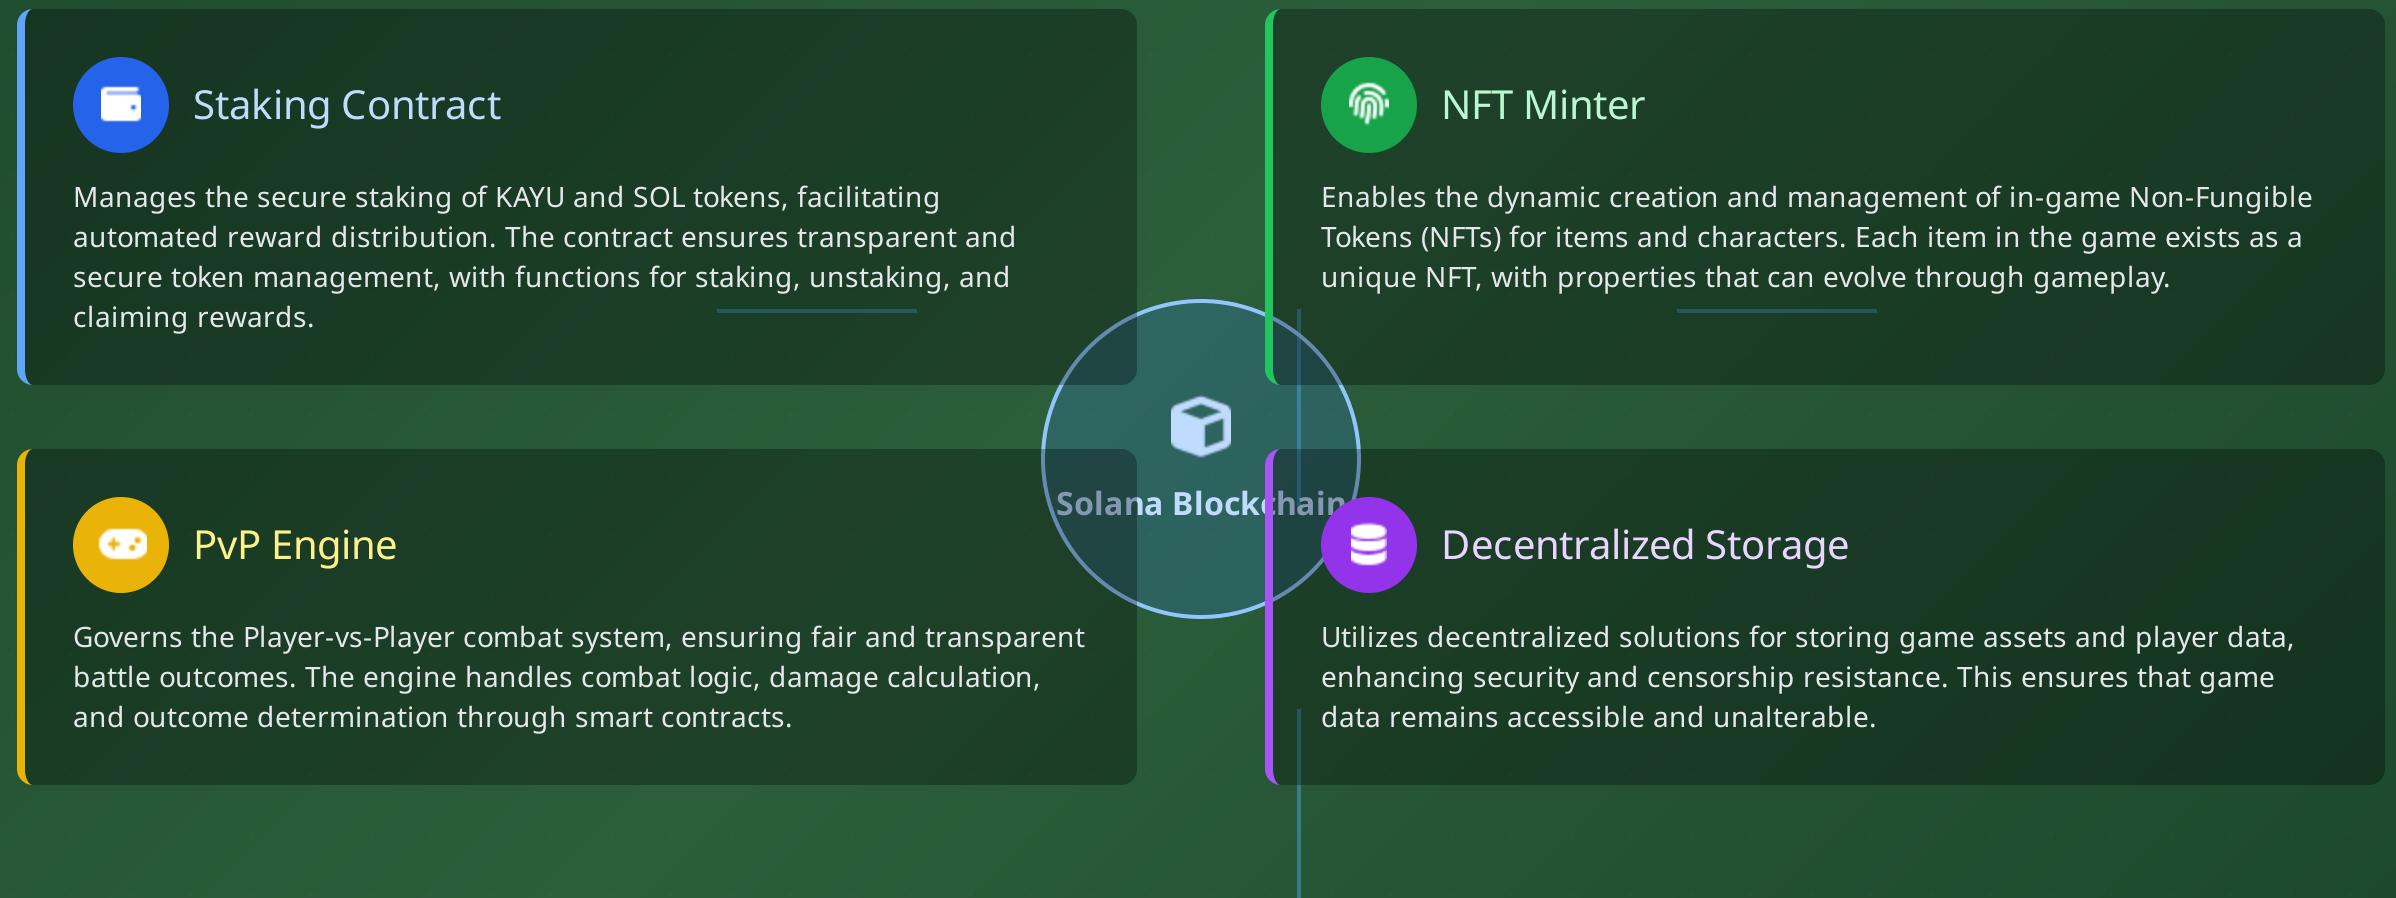

10,000,000 KAYU tokens allocated for airdrops:

👤 5,000,000 to FlipFlop nodes

👥 5,000,000 to Solana players

Technical Architecture

Eternal Continent is built on a robust and scalable technical foundation, leveraging the Solana blockchain for its high throughput and low transaction fees. This architecture ensures a seamless and responsive gaming experience.

Staking Mechanism

What is Staking?

The Eternal Continent staking system allows players to lock their KAYU or SOL tokens to actively participate in the game's economy.

Players earn rewards based on staked amount and duration, creating a passive income stream within the ecosystem.

Staking Process

-  Lock KAYU/SOL tokens
-  Wait for rewards
-  Unstake when needed

```
use anchor_lang::prelude::*;
use anchor_spl::token::{self, Token, TokenAccount};
declare_id!("FjPustc7ikQnzMfDHYEs7mkZaihwoJ6kiyAiQavW");

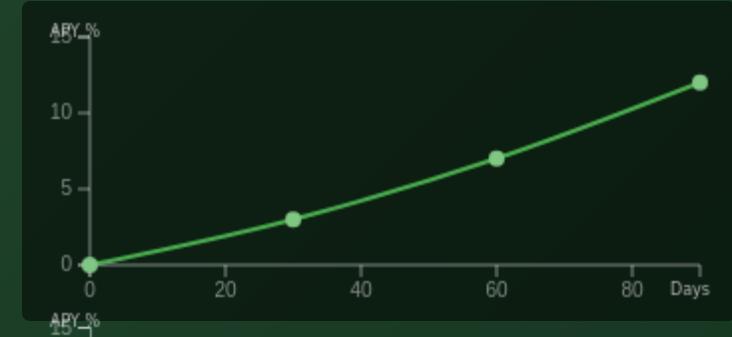

#[program]
pub mod staking {
    use super::*;

    pub fn stake(ctx: Context<Stake>, amount: u64) {
        // Record stake info
        let user_stake = &mut ctx.accounts.user_stake;
        let clock = Clock::get()?;
        user_stake.owner = ctx.accounts.user.key();
        user_stake.amount += amount;
        user_stake.last_update = clock.unix_timestamp;

        // Transfer tokens to vault
        let cpi_accounts = Transfer {
            from: ctx.accounts.user_token_account.to_account(),
            to: ctx.accounts.vault.to_account_info(),
            authority: ctx.accounts.user.to_account_info(),
        };
        transfer(cpi_accounts, amount);
    }

    pub fn unstake(ctx: Context<Unstake>) {
        let user_stake = &mut ctx.accounts.user_stake;
        let clock = Clock::get()?;
        user_stake.amount -= ctx.accounts.vault.amount;
        user_stake.last_update = clock.unix_timestamp;
    }
}
```

Staking Rewards

Key Benefits

-  Security: Staking helps secure the network
-  Passive Income: Earn rewards while holding
-  Exclusive Items: Access to rare game items

Staking Parameters

Min. Stake:	100 KAYU
Lock Period:	7-90 days
APY Range:	5%-12%

Reward System

Eternal Continent implements a transparent reward system based on staking duration and amount. The longer you stake your KAYU or SOL tokens, the more rewards you'll earn.

Reward Calculation

```
pub fn claim_rewards(ctx: Context<ClaimRewards>) -> Result<()> {
    let user_stake = &mut ctx.accounts.user_stake;
    let clock = Clock::get()?;

    let time_passed = clock.unix_timestamp - user_stake.last_update;

    let reward = (user_stake.amount as u128 * time_passed as
u128 * 1) / 86400 / 1000;

    // Update last update time
    user_stake.last_update = clock.unix_timestamp;

    // Distribute rewards (logic follows)
    Ok(())
}
```

Daily Reward Rate

Rewards are calculated based on the staked amount and the time elapsed since the last update, with a daily reward rate.

Reward Accumulation

Staking Benefits

- ✓ Passive income generation while maintaining control over your assets
- ✓ Longer staking periods yield significantly higher rewards
- ✓ Automated reward distribution with each claim
- ✓ Integration with both KAYU and SOL staking mechanisms

NFT Integration

In Eternal Continent, every significant in-game item is represented as a unique Non-Fungible Token (NFT), with properties that evolve through gameplay, adding depth and real-world value to player assets.

Dynamic NFT Properties

Weapons & Armor

Unique stats and attributes for each piece, representing in-game power levels.

Characters

Playable characters with evolving abilities and ownership rights.

Evolving Properties

Items can increase in power through gameplay and staking.

Tradeable Assets

Players can freely exchange NFTs on marketplaces, creating real-world value.

NFT System Benefits

- ✓ True ownership of in-game assets
- ✓ Verifiable item history and provenance
- ✓ Interoperability across blockchain games
- ✓ Economic value tied to gameplay performance

NFT Metadata Structure

```
export function toNftMetadata(item: GeneratedItem) {
  return {
    name: item.name,
    symbol: "KAYU",
    description: `Class: ${item.class} | Slot: ${item.slot} | Rarity: ${item.rarity} | Power: ${item.powerScore}`,
    attributes: [
      { trait_type: "Class", value: item.class },
      { trait_type: "Slot", value: item.slot },
      { trait_type: "Rarity", value: item.rarity },
      { trait_type: "Level", value: item.level },
      ...Object.entries(item.base).map(([k, v]) => ({ trait_type: k, value: v })),
      ...item.affixes.map(a => ({ trait_type: a.key, value: a.value })),
    ],
    properties: {
      category: "game-item",
      files: [],
    },
    external_url: ""
  };
}
```

PvP Combat System

The Player-vs-Player (PvP) combat system in Eternal Continent is designed for strategic depth and transparent outcomes, with core mechanics governed by smart contracts to ensure fairness.

🛡️ Damage Calculation

Damage is calculated based on attacker's power, target's defense, and critical hit chance.

⚖️ Fair Outcomes

Smart contracts ensure transparent battle outcomes, eliminating RNG manipulation.

⚙️ On-Chain Verification

All combat calculations are performed on the blockchain for ultimate transparency.

```
// Fighter Structure
struct Fighter {name: String, hp: i32, atk: i32, def: i32, crit: f32}
impl Fighter {fn attack(&mut self, target: &mut Fighter) -> String
let mut rng = rand::thread_rng(); let mut dmg = self.atk - target.def;
if dmg < 1 { dmg = 1; } if rng.genf32() < self.crit {dmg *= 2; }
    if target.hp < 0 {
        target.hp = 0;
    }

    format!("{} hits {} for {} damage! ({} HP left)", self.name, self.atk, dmg, target.hp)
}
```

Combat Process Flow

Attacker

Damage
Calc

Target

Smart Contract Benefits

- ✓ Immutable rules ensure consistent gameplay
- ✓ Transparent calculations build player trust
- ✓ Decentralized enforcement of game rules

SOL Staking & NFT Minting

SOL Staking Contract

Allows users to stake SOL tokens as a secure way to earn passive income in the Eternal Continent ecosystem.

```
pub fn stake_sol(ctx: Context<StakeSol>, lamports: u64) -> Result<(), Error> {
    require!(lamports > 0, ErrorCode::InvalidAmount);
    let user_stake = &mut ctx.accounts.user_stake;
    let now = Clock::get()?.unix_timestamp;
    if user_stake.owner == Pubkey::default() {
        user_stake.owner = ctx.accounts.user.key();
        user_stake.last_update = now;
    }
    require_keys_eq!(user_stake.owner, ctx.accounts.user.key());
    let ix = system_instruction::transfer(
        &ctx.accounts.user.key(),
        &ctx.accounts.vault.key(),
        lamports,
    );
    anchor_lang::solana_program::program::invoke(
        &ix,
        &[
            ctx.accounts.user.to_account_info(),
            ctx.accounts.vault.to_account_info(),
            ctx.accounts.system_program.to_account_info(),
        ],
    )?;
}
```

Input Validation

Checks if lamports > 0

Ownership Check

Verifies user ownership

These smart contracts form the foundation of the Eternal Continent's economic system, enabling secure staking and unique item creation.

NFT Minting Contract

Enables the dynamic creation of in-game Non-Fungible Tokens (NFTs) for items and characters.

```
pub fn mint_nft(
    ctx: Context<MintNft>,
    name: String,
    symbol: String,
    uri: String,
    seller_fee_basis_points: u16,
) -> Result<(), Error> {
    token::initialize_mint2(
        CpiContext::new(
            ctx.accounts.token_program.to_account_info(),
            token::InitializeMint2 {
                mint: ctx.accounts.mint.to_account_info(),
            },
        ),
        0,
        &ctx.accounts.mint_auth.key(),
        Some(&ctx.accounts.mint_auth.key()),
    )?;
}
```

Unique Items

Each item is one-of-a-kind

Ownership Transfer

Fully verifiable on blockchain

Development Roadmap

Foundation (Q1 2024)

Foundation

Q1 2024

- ✓ Smart contract deployment and auditing
- ✓ Core game mechanics implementation
- ✓ Community building and partnerships

Launch (Q2 2024)

Launch

Q2 2024

- ✓ Public beta release
- ✓ KAYU token fair launch on FlipFlop
- ✓ Initial faction gameplay release

Expansion (Q3-Q4 2024)

Expansion

Q3-Q4 2024

- ✓ Full world map implementation
- ✓ Advanced PvP systems
- ✓ NFT marketplace integration

Evolution (2025)

Evolution

2025

- ✓ Mobile app development
- ✓ VR/AR integration research
- ✓ Governance token implementation

"From foundation to evolution, Eternal Continent will continuously grow and adapt to player needs."

Token Ownership

Total Supply: 1,000,000,000 KAYU tokens

- 250,000,000 KAYU (25%) minted on FlipFlop platform
- 750,000,000 KAYU (75%) permanently destroyed
- 10,000,000 KAYU allocated for airdrops
